# EVOLUTION OF CRYPTOCURRENCY

- **Bitcoin, the world's first cryptocurrency, was used in a transaction for the first time in 2010. From the day 10,000 Bitcoin was used to buy two large pizzas to the day Bitcoin traded for \$69000, the journey of cryptocurrency around the world, and particularly in India, has been nothing short of a rollercoaster ride.**
- **As cryptocurrency gained popularity around the world, the Indian market became**
- **interested in it as well. Crypto exchanges founded by tech-savvy entrepreneurs arose**
- **to bridge the supply-demand gap. With the nationwide policy push toward**
- **digitalisation, internet penetration has increased, as has smartphone adoption.**
